

## FULL LINE GEHL. COMPACT EXCAVATORS

In 1859, an agricultural implement company, housed in a blacksmith shop, was started in West Bend, Wisconsin. From these humble beginnings, the Gehl brand has become a major force in the compact equipment industry worldwide.

Since the beginning, Gehl has focused on providing solutions to our customer's needs by building quality, reliable products. With a long history of reliability and innovation, Gehl is responsive to the equipment and service needs of our customers.

With modern compact equipment manufacturing facilities in Yankton and Madison, South Dakota, and a state-of-the-art research and design facility in West Bend, Wisconsin, Gehl ensures that they are equipped with the finest in technology, tools and materials. And our top corps of engineers are skilled in designing and enhancing high-quality machines to fit the specific needs of our customers. Our equipment is modern in design and performance, but not too complicated to operate or service.

And when you purchase a piece of Gehl equipment, you have an entire organization behind you and your business. When you need support, whether it be financing, parts or service, know that Gehl will be there to provide an exceptional experience. We continually strive to preserve the level of personalized attention that Gehl began with in 1859.

#### Z35 GEN:2 | Z45 GEN:2 | Z80

Since entering the excavator market in 1987, Gehl has worked its tail off to offer a solid line up of compact excavators.

#### INDUSTRY PROVEN -

Yanmar engines provide reliability, maximum power and proven emissions technology to handle demanding jobs.

TRUE ZERO-TAIL-SWING – That means no overhang over the tracks on any model in the Gehl product line.

#### POWER-A-TACH® QUICK COUPLER –

Connect attachments hydraulically from the operators station *(not available on Z17)*.

GEH

HYDRAULIC THUMB – Factory-installed hydraulic thumb option adds versatility to the jobsite (not available on Z17).

COMPACT EXCAVATORS

The Gehl Z17 compact excavator is small in size, but big on power. Small enough to maneuver in tight spaces, the Z17 delivers power and hydraulic performance to get the job done quickly and efficiently.

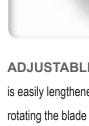

**COMPACT POWER** – Yanmar 13.5 hp (10.1 kW) Tier IV diesel engine provides the power needed to handle demanding tasks.

ADDED STABILITY – The undercarriage hydraulically extends to 4'2" (1280 mm) for extra stability or retracts to 3'1" (950 mm) to allow access to tight jobsites and for operation in confined spaces.

POWERFUL HYDRAULICS - The hydraulic system is designed to enhance engine performance, resulting in a more efficient system.

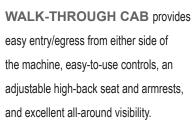

**HIGH-PERFORMANCE BOOM** is constructed with thick side plates and a single-pin mounted design for optimal strength and durability.

SMALL SIZE... BIG POW

panel under the operator seat.

Z17

**ADJUSTABLE BLADE** width is easily lengthened or contracted by rotating the blade extensions to match the desired undercarriage width.

ZERO-TAIL-SWING design allows operation near structures or obstacles without causing damage to the upper structure.

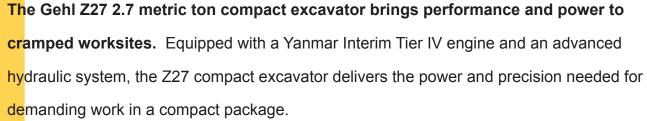

EASY SERVICEABILITY and simple daily maintenance checks are achieved through the removable side panels, large rear door and access

EXTRA PROTECTION on the bucket, dipper and boom cylinders is provided by plate spring cylinder guards. The upper structure's lower frame is reinforced by high-strength steel covers.

POWER-A-TACH® QUICK COUPLER – Change attachments hydraulically with the flip of a switch. The operator leaves the seat only to engage and disengage the safety pin.

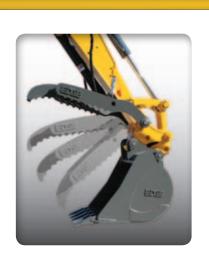

EXTRA VERSATILITY and productivity on the jobsite is made possible with the optional factory-installed hydraulic thumb attachment.

TRUE ZERO-TAIL-SWING design means no part of the upper

**ON-DEMAND HYDRAULICS** incorporate four hydraulic pumps which require less engine power and provide no loss of hydraulic performance during simultaneous movements.

side plates. Heavy-duty cylinder from dirt and damage.

structure overhangs the tracks during rotation. Cast side protectors provide added protection at the base of the house.

EASY SERVICE ACCESS is achieved with the large rear door, removable side covers, and removable cover beneath the operator's seat.

**HIGH-PERFORMANCE BOOM** is constructed with thick, reinforced guards shield the cylinders and rods

**OPERATOR FRIENDLY** cab features ergonomic controls and excellent visibility. Optional fully-enclosed cab with heat further enhances operator comfort.

POWER-A-TACH<sup>®</sup> Quick Coupler allows hydraulic attachment changes with the flip of a switch. The operator leaves the seat only to engage and disengage the safety pin.

, I

TIER IV CERTIFIED 23.9 hp (17.8 kW) electronically controlled Yanmar diesel engine provides 20% less fuel consumption and features an electronic throttle for precise control.

The all-new Gehl Z35 GEN:2 compact excavator incorporates innovative design for precise digging performance. An increase in reach at ground level and flat bottom dig depth requires less machine positioning, increasing productivity. The factory installed hydraulic thumb option adds another dimension of adaptability.

GEHL

DIGITAL OPERATOR INTERFACE - Located in a highly-visible area and backlit for improved visibility, this interface features:

- An hour meter and clock
- Recordable maintenance history with adjustable time intervals and reminders
- Multiple language selections
- E Function which records hours used for past 90 days and can be monitored without starting the engine

PROPORTIONAL **CONTROLS** for auxiliary hydraulics provide smooth, precise hydraulic control for optimal attachment performance.

#### Z35 GEN:2

**ENHANCED SERVICE** ACCESS is achieved with two large rear doors, a swing-open side access panel, and removable covers beneath the operator's seat.

LARGER CAB features state-ofthe-art controls, digital display and excellent visibility. Optional enclosed cab with heat and air-conditioning further enhances operator comfort.

HIGH EFFICIENCY is achieved with ECO mode and auto deceleration. These features improve fuel economy, decrease noise and lower emissions levels by reducing engine speed when not necessary.

COMPACT EXCAVATORS

Turn to the ALL-NEW highperforming Gehl Z45 GEN:2 4.5 metric ton compact excavator for additional digging force in a zero-tail-swing configuration. High-performance hydraulics and a powerful Yanmar diesel engine combine to provide the ultimate

in effectiveness in a variety of applications.

HYDRAULIC FLOW Four hydraulic pumps provide the ample flow required for smooth operation, even while using the boom and arm simultaneously during turning.

**FIRM GRIP** Optional hydraulic thumb attachment comes factory installed, adding versatility and enhancing productivity for a wide variety of applications.

# **NEW** digital operator interface

Located in a highly-visible area and backlit for improved visibility, this interface features:

- Hour meter and clock
- Engine Regeneration Alerts and procedural information
- Recordable maintenance history with adjustable time intervals and reminders
- Multiple language selections
- Function which records hours used for past 90 days and can be monitored without starting the engine

**POWER-A-TACH**<sup>®</sup> allows hydraulic attachment changes with the flip of a switch. The operator leaves the seat only to engage and disengage the safety pin.

# **NEW** cab features

**4-WAY ADJUSTABLE SEAT** Fully adjustable seat with retractable belt for custom height, weight and backrest positions. **RADIO READY** Speakers are standard with the cab model. One bracket allows simple radio installation.

#### Z45 GEN:2

**TRUE EFFICIENCY** ECO mode and auto deceleration improve fuel economy, decrease noise and lower emissions by reducing engine speed when not necessary.

NEW! YANMAR TIER IV DIESEL ENGINE Powerful, proven Yanmar Tier IV engine offers reliable operation and a fuel efficient system.

EASY SERVICE ACCESS Large, rear hood opens easily to expose the battery, engine oil, air filter and cooling system.

#### 2-SPEED BUTTON WITH DETENT

Upgrading from a pedal, the 2-speed button frees up the operator's feet during travel.

The Gehl Z80 compact excavator brings power and intelligence together in one zerotail-swing model. Power is provided with a 54.6 hp (40.7 kW) Yanmar Interim Tier IV diesel engine. Intelligence comes with the ECO mode and auto deceleration, improving fuel economy and lowering emission levels.

POWER-A-TACH® QUICK COUPLER – Change attachments hydraulically with the flip of a switch. The operator leaves the seat only to engage and disengage the safety pin.

**HIGH STRENGTH BOOM** – Constructed with thick side plates and mounted to the upper structure with a solid, single pin for added strength and durability. A heavy-duty cylinder guard protects boom cylinder and rod from damage. An optional factory-installed hydraulic thumb attachment adds versatility to the machine.

ZERO-TAIL-SWING design allows the superstructure to rotate entirely within the tracks without overhang, allowing operation close to walls and other obstacles.

ECO MODE is activated with

speed is not necessary.

**ON-DEMAND HYDRAULICS** provide no loss of hydraulic performance during simultaneous movements, allowing smooth operation even while using the boom and arm during turning.

provides a spacious, ergonomic operating environment. The cab is mounted on five silicon, oil-filled vibration to the operator.

Z 8 0

the flip of a switch, reducing engine speed by 10% without sacrificing power. This saves fuel when full

SERVICEABILITY and daily maintenance checks are made easy with the large removable side panels, flip-open rear engine door and under-seat access panel.

**OVERSIZED CAB** enclosure isolators which reduce cab noise and

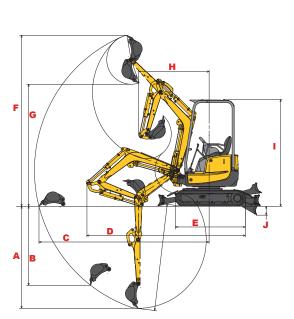

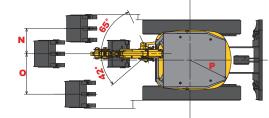

**AUTO DECELERATION** improves fuel economy, decreases noise and lowers emissions levels by reducing engine speed to idle after four seconds without hydraulic movement.

† Lifting Capacity Charts Notes

- Lifting capacity charts Notes
  Lifting capacity is hydraulically limited (denoted with \*).
  Lifting capacity calculated with standard Power-A-Tach<sup>®</sup> quick coupler on models Z27, Z35 GEN:2, Z45 GEN:2 and Z80.
- Note where applicable specifications conform to ISO standards.

· Weight of all lifting devices and attachment must be deducted to determine load that can be lifted.

Lift point is bucket hinge point.

#### **EMISSIONS CLASSIFICATION**

EXC-4M-0114

Machines with this decal comply with Tier IV standards

**GET ATTACHED** 

With a wide variety of EDGE<sup>®</sup> attachments available from your authorized dealer, Gehl Compact Excavators are easily transformed to meet the needs of your business.

Gehl reminds users to read and understand the operator's manual before operating any equipment. Also, make sure all safety devices and shields are in place and functioning properly.

Gehl reserves the right to add improvements or make changes in specifications at any time without notice or obligation.

## JWNER DRIVEN

Gehl authorized dealers offer a full line of compact equipment, backed up by an exceptional sales, service and parts experience.

For more information on Gehl Compact Excavators and the rest of the Gehl equipment line, call our hotline at

-800-528-0491 or visit gehl.com
