

FLIP SCREENING

PORTABLE. PRODUCTIVE. PROFITABLE.

S45 FLIP SCREEN

Save bucket loads on waste disposal fees, raw materials and transportation costs by screening onsite with the super tough S45 Flip Screen.

The multi award winning Flip Screen can screen an enormous range of materials – anything from bricks, concrete, scrap metal and hard rock through to soil, sandstone, gravel and compost can all be inexpensively and efficiently processed onsite. Construction, demolition, civil engineering, waste recycling, skip bins/roll off boxes, scrap metal recovery, landscaping and quarrying are just some of the industries that are benefiting from the extremely economical Flip Screen.

Made to withstand the toughest conditions the S45 Flip Screen has super high-tensile mesh screens that range in size from 5/8" to 3" (17mm to 75mm) and are changed in under 4 minutes.

Your skid steer does not need high-flow and installation is a quick and easy process. The unit uses a smooth 360 degree rotating action with no shaking or vibrating - dramatically increasing the effective life of your skid steer.
