

MODEL SG-40WH

Rubber Tire Stump Grinder

The SG-40WH is a **compact, all-terrain machine** suiting the needs of multiple stump grinding professionals. **Key features** on the SG-40WH include a beltless cutterwheel drive system, enhanced operator visibility, efficient machine travel speed, and high maneuverability.

CUTTERWHEEL DRIVE

The Bandit SG-40WH comes equipped with the same features as the SG-40W, but what differentiates these two machines apart is the cutterwheel drive system. The SG-40WH is driven by a hydraulic motor mounted on the side of the cutterwheel eliminating the need to conduct periodic belt maintenance.

OPTIMAL VISIBILITY

Operator controls are mounted on a 3-position console. So, no matter the position of the stump, you'll be able to get an excellent view of the grinding action. Two joysticks control the travel of the unit, while a single, easy to use joystick controls all cutterwheel functions. This set-up allows an operator to efficiently control all functions increasing versatility and productivity.

AGGRESSIVE CUTTING ACTION

The SG-40WH is engineered to provide maximum torque and power. Available cutterwheel options include a Bandit wheel with Greenteeth or a New Revolution wheel with hex teeth, allowing users to choose the configuration that best suits their needs.

POWERFUL EFI ENGINE

Powerful EFI gasoline engine is easy to start, operate, and provides ample torque to power the cutterwheel through stumps of various sizes.

DURABLE DRIVE SYSTEM WITH FLOTATION TIRES

Four-wheel drive is standard providing maximum power to traverse over softer terrain conditions. Wide profile tires provide a stable grinding platform all while enhancing flotation.
