

**INCREDIBLE
PERFORMANCE**
on low flow
machines!

**CLOSED FRONT
EXTREME DUTY
BRUSH CUTTER**

Visit our web site
for a demo video!

FEATURES INCLUDE:

- 72" model has 4 double edged blades
- 60" model has 3 double edged blades
- Requires only 16 GPMs
- Cuts up to 5" trees
- Bearing seal protection kit under deck
- Rugged deck with heavy reinforcements
- Dual crossover relief valves in motor

SIZE	WEIGHT	REQUIRED GPM
60"	1250 lbs.	16-25
72"	1526 lbs.	16-25

The extreme duty brush cutter is a high powered, low flow, direct drive unit. The hydraulic motor drives a 2-5/8" shaft that is housed in 2 massive bearings submerged in oil. Instead of a spline shaft under the deck, it has a 13" x 1" flange with 10 countersunk bolts connecting the blade carrier. The bearing seal protection kit between the deck and blade carrier keeps fence wire and vines away from the lower bearing seal, and reduces down time from hidden debris. This quiet, powerful cutter produces a cleaner cut with quicker travel speed than was previously possible on a low flow skid steer. The 10" deck clearance and raised back allow cut debris to escape easily to avoid bunching under the deck.
