

# Grapple Rakes Standard / Compact Tractor

Standard Grapple Rake

Compact Tractor Grapple Rake

Our Grapple Rakes are ideal for raking and loading debris. The shape of the grapple makes it easy to roll debris into tight places. We use American made cylinders, rated at 4,000 psi, to handle the toughest jobs. Our Compact Tractor Grapple Rake is for use on tractors less than 40 HP. The Compact Tractor Grapple Rake is built heavy enough for rigorous use, but light enough for compact tractors. The Compact version is available in a single cylinder grapple 2x6 (48", 54", 60", 66") or a dual cylinder grapples 2x6 (60", 66"). Our re-designed Standard Duty Grapple Rakes are constructed from 3/8 AR400 Steel, and are rated for machines with 35-60 HP. The new design provides more strength, combined with a lower weight to maximize your grapping power.

- Unique design makes it easy to roll debris into tight piles
- Standard Duty sizes: 63", 66", 72"
- Compact Tractor Sizes: 48", 54", 60", 66"
- Compact Tractor Dual Cylinder sizes: 60", 66"
