

CONFIGURATION:
-SK500LC -9-23'-0" BOOM (WITH DUEL PIN PO SITIONS FOR BOOM CYLINDERS) -20' STIC K WITH SK350 TIP
---- HOISTCYUNDERS ON UPPER PIVOT

- HOISTCYUNDERS ON LOWER PIVOT

Lift capacities calculated at attachment pivot point on stick (lbs).
No attachment on stick. Attachment weight must be subtracted.

## HOIST CYLINDERS ON LOWER PIVOT

The following notes pertain to this machine equipped with $35.5^{\prime \prime}$ wide track pads:

1. Do not attempt to lift or hold any load that exceeds these rated values at their specified load radii and heights.
2. The least stable position is over the side.
3. The operator should be fully acquainted with machine operation before operating the machine.
4. Litting capacities assume a machine standing on level, firm and uniform supporting surface. Operator must make allowance for job conditions such as soft or uneven ground, out of level conditions, side loads, sudden stopping of loads, hazardous conditions, inexperienced personnel, etc.
5. The above theoretical ratings are based on calculations derived from standard O.E.M. lift charts. They do not exceed $87 \%$ of hydraulic lifting capacity or
