

FTX290

A balance of large tractor features and compact maneuverability point to the Fecon FTX290 as the mid sized mulching tractor for high productivity. Operator visibility of the mulching head and the tracks and smooth control response makes easy work in tight areas or in dense forest. Low ground pressure, 30" wide oscillating tracks, and balanced weight distribution let the FTX290 get in and out of soft ground applications. Large Engine bay doors, tilt cab, and easily reached daily check points minimize maintenance time. The FTX290 is outfitted with the BH120 Fecon Bull Hog® with a choice of 3 rotor designs and many tooling options. Soil milling is possible with the addition of the Fecon FMA9032 Soil Hog.

Large Cab

Accessibility

Rear 15,000 lb Winch (optional)

System Monitoring

FEATURES

- 290 hp Cummins Tier III
- 101 GPM / 5510 PSI High Flow
- Large Cab Comfort and Visibility
