

JARRAFF

By *Pinotti*

Jarraff wheels shown in transport mode.

Articulated undercarriage, hydrostatic all-time four-wheel drive, 10-ton winch, and tire and track options enables access to the most difficult terrains.

JARRAFF ALL-TERRAIN TREE TRIMMER

SAFER

Keep your operators safe in a ROPS and FOPS, climate-controlled cab full of safety features like LED lights, cameras, dielectric-tested boom, safety switches, and more.

EASIER FASTER

Reduces your tree trimming work to a one-person, one-machine job. Touch screen, joystick controls, and on-site training makes start-up fast and effective.

Performs 5-10 times the work daily over conventional methods like bucket trucks, lifts, and climbers. The Jarraff is the most advanced, automated method for trimming available.

Seventy-five foot reach, 360-degree boom rotation and 180-degree saw blade rotation enables unparalleled access and precision cutting to ANSI standards.

ACCURATE

PROFITABLE

Exceptional longevity and hours of use, low down time, ease of service, and low total cost of ownership. Forty-year reputation for parts and service response.

Designed for Right-of-Way maintenance for utilities and sold direct to utilities and their contractors. Fully manufactured in the U.S. by woman-owned Jarraff Industries.

FOR THE SMARTER WAY TO TRIM TREES

THE JARRAFF ALL-TERRAIN TREE TRIMMER

Manufactured in the USA, the Jarraff All-Terrain Tree Trimmer is designed for Right-of-Way maintenance operations in the most difficult to the most sensitive terrain. The Jarraff is simply the smartest way to trim trees. Contact Jarraff Industries today.

A large yellow tracked tree trimmer is positioned on a dirt path in a dense forest. The machine has a long, white boom extending upwards and to the left. A worker wearing a hard hat and a high-visibility vest stands on the side of the machine. The background is filled with tall, thin trees.

HE'LL DO MORE IN ONE DAY
with a Jarraff All-Terrain Tree Trimmer
Than the Entire Crew Will in One Week
and Go Home Safe

4-Wheel Drive SPECIFICATIONS

ELECTRICAL SYSTEM

- Power Requirements
- 12V - DC

BOOM, SAW HEAD, WINCH & PUSH BLADE

- Boom Construction - High-tensile, non-conductive fiberglass
- Saw Blade Diameter - 24 inches (610 mm)
- Saw Blade RPM - 3200 RPM
- Push Blade - 8 feet wide, hydraulically powered
- Winch - 20,000 lb winch (9072 kg); 150 feet (45.7 m) of 5/8 inch (16 mm) cable included with chain and hook

OPERATIONAL CAPACITIES

- Maximum Cutting height - 75 feet (22.9 m)
- Rotation - 360° on turntable
- Rotation - 180° on boom
- Controls - Joysticks, Foot Travel Pedal and Service Brake

PHYSICAL SPECIFICATIONS

- Traveling Length - 41 feet 6 inches (12.65 m)

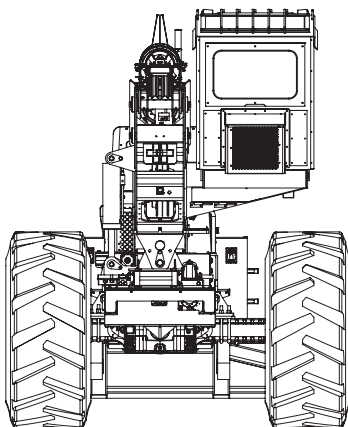

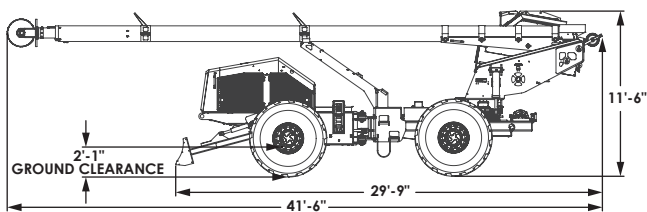

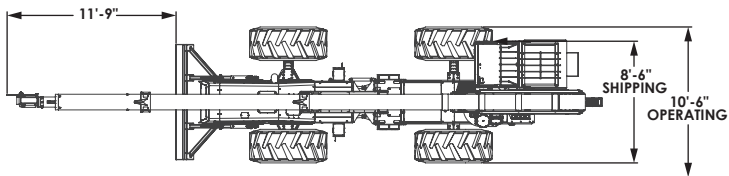

4-Wheel Drive Model (Standard Tire Size - 28L x 26)	
Undercarriage	Articulation
Weight	24,820 lbs (11,260 Kg) Full Wet Weight
Ground Pressure	6.7 PSI (0.46 Bar)
Width	Transport - 8 feet 6 inch (2.62 m) Operating - 10 feet 4 inch (3.15 m)
Carrier Length	25 ft (7.62 m)
Height	11 feet 6 inch (3.51 m)

ADDITIONAL TIRE SIZES AVAILABLE:

Tire Size	Ground Pressure
23.1 x 26	8.2 PSI* (0.56 Bar)
67 x 3400 x 26	9.1 PSI* (0.63 Bar)
66 x 4300 x 25	5.3 PSI* (0.36 Bar)

*Ground pressure @ 3" penetration and manufacturer recommended tire pressure
