# **Lifting Capacities**

A – Reach from swing centerline to arm tip

C – Lifting capacities in pounds (kilograms)

- 1. Do not attempt to lift or hold any load that is greater than these lift capacities at their specified lift point radius and heights. Weight of all accessories must be deducted from the above lift capacities.

  2. Lift capacities are based on machine standing on level, firm, and uniform ground. User must make allowance for job conditions such as soft or
- uneven ground, out of level conditions, side loads, sudden stopping of loads, hazardous conditions, experience of personnel, etc.

  3. Arm bucket pin, without bucket is defined as lift point.
- 4. The above lifting capacities are in compliance with SAE J/ISO 10567. They do not exceed 87 % of hydraulic lifting capacity or 75 % of tipping load. Lifting capacities marked with an asterisk (\*) are limited by hydraulic capacity rather than tipping load. 5. Operator should be fully acquainted with the Operator's and Maintenance Instructions before operating this machine. Rules for safe operation of equipment should be adhered to at all times.
- 6. Lift capacities apply to only machines as originally manufactured and normally equipped by KOBELCO CONSTRUCTION MACHINERY CO., LTD.

nquiries To:		

**KOBELCO Hydraulic Excavator** ■ Bucket Capacity: 0.75 - 1.875 cu. yd. SAE ■ Engine Power: 252hp {188 kW} @ 2,100 rpm (SAE NET) SK300LC-10 ■ Operating Weight: 68,100lbs {30,900 kg} Complies with the latest exhaust emission regulations US EPA EU (NRMM) **Tier IV Final** 

# More power and higher efficiency.

Power to do more, faster

# **Digging Volume**

The SK300LC offers dynamic digging force even as it minimizes fuel consumption, achieving class-leading work volume H-mode is used for maximum productivity, delivering 5% greater digging volume.

# **Heavy Lift**

High hydraulic pressure (Heavy Lift) means greater lifting power, at close radius, allowing for smooth and steady operation while moving heavy objects.

# **Independent Travel**

Selecting Independent Travel dedicates one hydraulic pump to travel and one to the attachment on a continuous basis, allowing for a smooth and constant movement speed even while swinging or using the boom or attachment. With Independent Travel, safely carrying a large pipe across a job site is a breeze.

# **Swing Priority**

Our exclusive system automatically and instantly delivers full swing power during combined operations. There's no need to mode-switch to make quick work of jobs like side-digging and back-filling.

# **Power Boost**

When you need more power instantly, engage Power Boost to get 10% more power with no time limit.

■ Max. Bucket Digging Force (ISO 6015)

With Power Boost: 46,800 bs (208kN)

■ Max. Arm Crowding Force (ISO 6015)

With Power Boost: 31,200lbs (139kN)

**Drawbar Pulling Force (SAE J1309)** 

Excellent drawbar force lets you conquer rough terrain and slopes.

62,900 bs (280kN)

# **Conforms to Tier IV Final exhaust emissions standards**

# **Reduces fuel consumption and minimizes** exhaust emissions

Hino engines are renowned for fuel efficiency and environmental performance, and KOBELCO has tuned them specifically for construction machinery.

The high-pressure common rail fuel injection system, the variable-geometry (VG) turbocharger, and the exhaust gas recirculation (EGR) system reduce particulate matter (PM) while the large EGR cooler greatly reduces the formation of Nitrogen Oxide (NOx) gases.

# SCR System with DEF VEW

Engine exhaust system utilizes Selective Catalytic Reduction (SCR) to convert NOx\* into harmless nitrogen and water emissions. SCR combined with a Diesel Particulate Filter

(DPF) makes a much cleaner machine meeting US EPA regulations for Tier IV final.

\*80% cleaner than Tier IV Interum

### **VG turbo reduces PM**

The variable-geometry turbocharger adjusts air intake to maximize combustion efficiency. At low engine speeds the nozzles are closed, the turbo speed increased and air intake is boosted. This helps lower fuel consumption.

### **EGR** cooler reduces **NO**x

Cooled exhaust gases from the EGR cooler are mixed with fresh air in the intake. The recirculated air lowers the combustion temperature which reduces NOx.

# Revolutionary technology boosts efficiency and minimizes fuel consumption

# ECO-mode: engineered for economy

Kobelco's ECO-mode maximizes the operating efficiency of the engine and other components to achieve much greater fuel efficiency. Just press a button to choose the operation mode best suited to the task at hand and the working conditions.

Optimal operation with three modes

H-mode • • • Maximum power for maximum productivity on your

S-mode • • • Ideal balance of productivity and fuel efficiency for a range of urban engineering projects

ECO-mode • • • Minimum fuel consumption for utility projects and other work that demands precision

### Boom to Arm Regeneration System VEW

Innovative engineering uses the downward movement of the boom to push fluid to the arm. Gravity and kinetic energy greatly reduce the amount of power needed to move fluid through the system.

# The boom weight puts force on the boom cylinder 2 Hydraulic fluid pushed from the boom cylinder goes to the arm cylinder

3 Arm cylinder retracts

Arm extends

# Hydraulic circuit reduces energy loss

Improved hydraulic line layout minimizes hydraulic pressure resistance from turbulence and valve restrictions. Fuel efficiency is increased because it takes less energy to move fluid through a circuit with low flow resistance.

# **AIS (Auto Idle Stop)**

The engine will stop automatically after 60 seconds of inactivity if the safety lock lever is in the up position. This eliminates wasteful idling during standby, saving fuel and reducing CO<sub>2</sub> emissions.

the risk of mechanical trouble and enhance longevity and durability.

# Hydraulic fluid filter

Recognized as the best in the industry, our super-fine filter separates out even the smallest particles. A new cover prevents contamination when changing filters.

# Hydraulic fluid filter restriction indicator

Detects clogging by measuring the difference in pressure between incoming and outgoing hydraulic fluid. Detecting contaminants before they can get into the hydraulic fluid reservoir reduces the risk of damage to the hydraulic system.

# **Double-element air cleaner**

The large-capacity element features a double-filter structure that keeps the engine running clean even in industrial environments.

# Fuel filter WEW

Pre-filter with built-in water-separator maximizes filtering performance.

# **Built to Operate in Tough Working Environments**

Redesigned boom offers excellent durability during demanding work conditions to reliably handle work volume.

# **500 Hour Attachment Lubrication Interval**

The self lubrication bushings are used at the attachment pins and the bushings with high abrasion resistant property are used at the pins around the bucket. The lubrication cycle

of the lubrication points around the bucket is 250 hours and that of other lubrication points is 500 hours.

\* Additionally the two piece bucket bushings protect the side of the arm from contact and then wear from the bucket ears. Should the bucket bushings need replacement, they can be replaced separately from the larger main bushing, reducing costs.

# **Three Track Guides**

Three heavy-duty track guides installed on each crawler side frame assure stability in the most demanding situations.

# **Comprehensive safety and intuitive operation**

# Safety

# **ROPS Cab**

ROPS (Roll-Over-Protective Structure)-compliant cab complies with ISO standards (ISO-12117-2: 2008) and ensures greater operator safety in the event of a roll-over. KOBELCO encourages operators to wear their seat belt during operation.

Standard FOPS, Top Guard Level II. (Meets ISO10262)

Mounting brackets for vandalism guards are standard equipment (contact your KOBELCO dealer to fit vandalism or front rock guards).

# **Expanded field of view for greater safety**

Standard rear-view camera eases safety checks behind the machine. Color video displays on cab monitor.

# Operator-friendly features that are easy to see, easy to use

# **Color Multi-display**

Brilliant colors differentiate multiple graphics on cab LCD. Graphics indicate fuel consumption, maintenance

- Analog-style gauges provide an intuitive reading of fuel level and engine temperature
- ② Green indicates ECO mode selected or efficient operation in other modes
- PM accumulation (left)/DEF level (right)
- 4 Fuel consumption/Rear-view camera
- **5** Digging mode switch
- 6 Monitor display switch

# **One-touch attachment mode switch**

A simple flick of switch converts the hydraulic circuit and flow amount to match attachments. Helpful icons let the operator confirm the proper configuration at a glance.

PM accumulation/DEF level

Fuel consumption

Breaker mode

Nibbler mode

Independent Travel mode

Rear-view camera

# Cab comfort takes a step ahead

# Comfort

# Climate control outlets behind the seat **WW**

# A light touch on the lever means smoother, less tiring work

Five air outlets deliver warm or cool air directly to the operator.

It takes 25% less effort to work the operation lever, which reduces fatigue over long working hours or continuous operations. \*Compared to SK350LC-9 model

# More comfortable seat means higher productivity

# **Quiet Inside**

The high level of air-tightness ensures a quiet, comfortable cabin interior.

# Interior equipment adds to comfort and convenience

# **Large door allows** easy access in and out of the cab

The expanded cab provides plenty of room for a large door, more headroom

# **Low Vibration**

Coil springs absorb small vibrations and high suspension mounts filled with silicone oil reduce heavy vibration. The long stroke achieved by this system provides excellent vibration protection.

# Wide, Open View Liberates the Operator

The front window features one large piece of glass without a center pillar on the right side for a wide, unobstructed view.

# Easy, on-the-spot maintenance VEW

Ample space in the engine compartment allows service staff to comfortably perform maintenance in a natural body position. The distance between access steps is smaller so getting to and from the engine compartment is easier. The hood is lighter and easier to raise and lower.

convenient storage compartment.

# **Ground-level Access**

Design allows for easy access at ground level for daily checks and maintenance work.

Laid out for easy access to radiator and cooling system elements

2 Fuel filter with integrated water separator

3 Engine oil filter

# **Easy Access to In-cab Maintenance Features**

Easy-access fuse box. DPF Manual Regeneration Switch

Air conditioner filter can be easily removed without tools for cleaning. One for outside air and one for inside air

# **Easy Cleaning**

easily cleaned of mud.

handles for easy removal.

Fuel tank features bottom flange and large drain valve for easy

# **Total Support for Machines with Network Speed and Accuracy**

KOMEXS is a satellite-based system for receiving machine information. Manage your machines anywhere in the world using the Internet. Location, workload and diagnostic data aid business operations.

### **Direct Access to Operational Status**

### **Location Data**

Accurate location data can be obtained even from sites where communications are difficult.

### **Operating Hours**

A comparison of operating times of machines at multiple locations shows which locations are busier and more profitable. Operating hours on site can be accurately recorded for running time calculations needed for rental machines, etc.

### **Fuel Consumption Data**

Data on fuel consumption and idling times can be used to indicate improvements in fuel consumption

### **Graph of Work Content**

The graph shows how working hours are divided among different operating categories, including digging, idling, traveling, and optional operations (N&B).

### Maintenance Data and Warning Alerts

# **Machine Maintenance Data**

Provides maintenance status of separate machines operating at multiple sites. Maintenance data is also relayed to KOBELCO service personnel, for more efficient planning of periodic servicing.

# **Security System**

### **Engine Start Alarm**

Sends a notification if the engine is started outside of pre-defined hours.

### Area Alarm

Sends a notification if the machine leaves a pre-defined area.

# Engine

Model	HINO J08EVV-KSDP					
Туре	Water-cooled, 4cycle 6cylinder direct injection type diesel engine with intercooler turbo-charger(complies with EU (NRMM) Stage IV, EPA Tier IV Final)					
No. of cylinders	6					
Bore and stroke	4.41" (112 mm) x 5.12" (130 mm)					
Displacement	468.9cu.in(7.684L)					
Rated power output	252hp{188kW} /2,100rpm (SAE NET)					
nateu power output	268hp {200kW} /2,100rpm (Without fan)					
Max. torque	729lb-ft {989N.m} /1,600rpm (SAE NET)					
iviax. torque	750lb-ft {1017N.m} /1,600rpm (Without fan)					

# ■ Hydraulic System

nyuraunc system	Triyaradiic System					
Pump						
Typo	Two variable displacement pumps +					
Туре	One gear pump					
May discharge flow	2 × 65.0 U.S.gpm {2 × 246L/min}					
Max. discharge flow	1 x 5.5 U.S.gpm {1 x 21 L/min}					
Relief valve setting						
Boom, arm and bucket	4,970psi {34.3Mpa}					
Power Boost	5,480psi {37.8Mpa}					
Travel circuit	4,970psi{34.3Mpa}					
Swing circuit	4,210psi{29.0Mpa}					
Control circuit	725psi{5.0Mpa}					
Pilot control pump	Gear type					
Main control valves	8-spool					
Oil cooler	Air cooled type					

# Swing System

Swing motor	Axial piston motor
Parking brake	Oil disc brake, hydraulic operated automatically
Swing speed	10.3rpm
Swing torque	72,723lb.ft {98.6kN·m} (SAE)
Tail swing radius	10'10"(3,300mm)
Min. front swing radius	14'6"(4,430)mm

# ■ Travel System

Travel motors	2 × Axial piston , two speed motors
Parking brakes	Oil disc brake per motors
Travel shoes	50 each side
Travel speed	3.2/1.9 mph{5.2 / 3.1km/h}
Drawbar pulling force	62,900lbs {280kN}(SAE J 1309)
Gradeability	70%{35deg}
Ground clearance	1'8"{510}

### Cab & Control

All-weather, sound-suppressed steel cab mounted on the silicon-sealed suspension mounts and equipped with a heavy, insulated floor mat.

Control
Two hand levers and two foot pedals for travel
Two hand levers for excavating and swing
Electric rotary-type engine throttle

# **I** Boom, Arm & Bucket

Boom cylinder	2-5.5" {140mm} x 4'3" {1305mm}
Arm cylinder	1-5.9" {150mm} x 5'6"(1675mm}
Bucket cylinder	1-5.1" {130mm} x 3'12"(1208mm)

### ■ Refilling Capacities & Lubrications

Fuel tank	132.9 U.S.gal {503L}	
Cooling system	9.2U.S.gal {35L}	
Engine oil	7.5U.S.gal {28.5L}	
Travel reduction gear	2×2.0U.S.gal {2×7.5L}	
Swing reduction gear	2.0U.S.gal {7.4L}	
Under die eil teels	64.7U.S.gal {245L} tank oil level	
Hydraulic oil tank	108.3U.S.gal {410L} hydraulic system	
DEF/AdBlue tank	21.9 U.S.gal {83L}

### STANDARD EQUIPMENT

■Turbocharged and inter-cooled HINO J08EVV-KSDP

■ Tier IV Final Diesel engine
■ Automatic engine deceleration
■ Two 12V, 112Ah batteries

■24V, 5kW starting motor

■60-amp alternator

Removable radiator clean-out screen

Automatic engine shut-down if low engine oil pressure

■ Side by side oil, hydraulic and engine radiators

■ Double-element air cleaner

### CONTROL

■Working mode selector

(H-mode, S-mode and ECO-mode)

■ Heavy Lift and Power Boost "without time limit"

SWING SYSTEM & TRAVEL SYSTEM

■ Swing rebound prevention system

■Independent travel system

■Two-speed travel with automatic down shift ■Sealed & lubricated track links

■31'5" {800mm} track shoes

■ Grease-type track adjusters ■Automatic swing brake

■Lower track guards

# HYDRAULIC

■ Exclusive boom to arm regeneration systems ■ Auto warm-up system

■ Hydraulic oil cooler

# MIRRORS & LIGHTS

■ Three rearview mirrors plus rear-view camera ■ Two front working lights

■ Swing flashers

### CAB & CONTROL

ROPS cab

■ Two pilot-operated control levers

■ Electric horn

■ Integrated left-right slide-type control box

■ All-weather, sound-insulated cab ■ Interior cab light

■ Coat hook

■ Luggage tray ■ Large cup holder

■ Detachable two-piece floor mat

■7-way adjustable suspension seat

■ Headrest ■ Handrails

Heater and defroster
 Intermittent windshield wiper with double-spray washer

Skyliaht ■ FOPS top guard

■ Tinted safety glass

■ Pull-type front window and removable lower front window ■ Easy to read multi-display monitor

■ Automatic climate control

■ Emergency escape hammer

■ AM/FM stereo radio ■ Travel alarm

■ Attachment pressure release switch

■ Manual DPF regeneration switch

■ 12V converter

■ Two-way control pattern changer

# OPTIONAL EQUIPMENT

■ Wide range of shoes ■ Boom & arm load (lock) holding valve

■ Front-guard protective structures
■ Additional hydraulic circuits
■ Heavy counter weight 1320lbs (600kg)

■ CAB two light ■ Right side camera Rain visor

■ Air suspention seat
